DETAILED ACTION

Continuing Data

The continuing data in the related-applications section (i.e. page 1, 1st paragraph) of the specification needs to be updated because US Application Number 10/648559 has issued as US Patent Number 7,166,217 B2.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-29 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Publication Number 2004/0026341 A1.

The applied reference has a common assignee and three common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention

Application/Control Number: 10/783,831

Art Unit: 1723

disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Claims 1-29 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Publication Number 2004/0026341 A1who discloses an apparatus for separating blood into, red blood cells, platelets and plasma, the apparatus comprising: a centrifuge (34) having a motor (16) and a rotor (1) including a first rotor portion defining a ring shaped area (3) receiving a blood separation bag (4) and a second rotor portion defining a central chamber cavity (2) receiving a platelet collection bag (33'), a plasma collection bag (33") and a red blood cell collection bag (33"); a squeezing system (page 26) for squeezing the separation bag and pumping centrifugally separated platelets, plasma and red blood cells to their respective collection bags (33', 33", 33"'), the squeezing system including a pump (80); and a controller (68) (see page 31) including a processor having programmed instructions provided by ROM and/or RAM, the controller (68) communicating with the pump (80), the motor (16), a pressure sensor (70), a first optical sensor (52), a second optical sensor (55) and a valving structure (72).

Response to Arguments

Applicant's arguments filed on January 17, 2007 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1723

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David A. Reifsnyder whose telephone number is (571) 272-1145. The examiner can normally be reached on M-F 9:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda M. Walker can be reached on (571) 272-1151. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
